

The PRE-PLANNED Financial/Economic 911 of 2008

WHAT: A pre-planned collapse of the US (and global) financial and economic systems.

WHO: The same characters who perpetrated the original 911.

WHERE: New York City & DC, of course. Plus a sideshow in Washington state.

WHEN: The days surrounding September 11, naturally.

HOW: Instead of painted drones, missiles with wings & big fins, and fake airplanes, they used the much more stealth short seller.

WHY: To remake the economic/financial order of the world into a “PPP”.

WHY Really: Think about it ! And then ask yourself, “**Cui bono?**”

The 911 blueprint worked so magically for the world controllers that they were compelled to use virtually the same playbook. “If it ain’t broke, why fix it?”

So, what’s the real deal here?

By analogy, let’s take a quick look at the 911 timeline and stack it up against the new 2008 Financial “911”, as it began to unfold earlier this year.

1. The Bear Stearns collapse that began in March 2008 is analogous to the 1st World Trade Center bombing in 1993. Just a warm up. This was preceded by a little failure back in January featuring Countrywide – the largest US mortgage lender.
2. The nationalization of Fannie Mae and Freddie Mac marks the beginning of the new 911. Both in the DC area, they were the first to come down this time. Just as they struck at the heart of the military complex, this time they went for the jugular of the national real estate market. Remember – this is a financial 911.
3. Next came this year’s version of the twin towers, building 7 and other assorted NYC landmarks in the form of Lehman Brothers, AIG, Merrill Lynch, as well as Morgan Stanley and Goldman Sachs in their “new & improved” form. It basically took out the whole of American investment brokerage.
4. And, of course, we still have Washington Mutual out there in the boonies just like the one that “crashed” in a PA farm field. *Update: WAMU is now history.*
5. Their MO! What else, but controlled demolition? Throughout 2008, and especially this month of September, we have seen some of the world’s largest banks, brokerage houses, mortgage lenders, insurance companies and investment

brokers go bust, as each of them fell perfectly into their own footprint faster than you can say: **C O N T R O L L E D D E M O L I T I O N ! ! !**

6. The 700 billion dollar Bailout Plan is just like the Patriot Act, isn't it? Only this time it's maybe a 1 or 2 page document that confers absolute authority on the Executive Branch to do just about anything they want with the taxpayer's money. And they want it rubber stamped now. Not tomorrow. NOW!!! Without discussion, or unnecessary congressional debate. Talk about **Shock & Awe** being used against the American people, and their elected representatives!?!
7. Now we know we can expect further gyrations, panics and precipitous declines in the market and elsewhere, just as we had anthrax attacks in the Capital, beltway snipers in Maryland in October of '02, the 3/11/04 train bombings in Madrid, and the 7/7/05 bombings in London. Not to mention the 50+ other synthetic terror events staged throughout the world to enforce compliance and create distraction.
8. The sudden and dramatic downfall of **NY Gov Eliot Spitzer** can also now be seen in its proper light. Having left the reservation one too many times, he simply could not be trusted to go with the flow. He had their numbers, their signatures (especially their **MO**'s), their addresses --- the whole ball of wax, as well as his own reputation to burnish. Eliot, to seal his fate, wrote a masterful expose on the subprime mortgage fiasco/fraud that was published in the WashPo just weeks before his public humiliation. He had recently testified before Congress as well. The elimination of John O'Neil, Head of Security at the WTC, is quite similar, except that John O. -- a great patriot -- died on 911, having just been given the job.
9. To date, the most obvious and glaring example of this manipulated takedown is the case of a NY Senator. His letter to the FDIC contained confidential information that triggered the IndyMac bank collapse in July. California AG Jerry Brown was called to review the entire affair after the OTS Director explicitly blamed the letter for causing a run on the bank (3rd largest bank failure in US history). This episode is eerily reminiscent of Larry Silverstein's order to, "Pull it." just prior to the expertly controlled demolition of Building # 7 on 911.
10. Just as 911 was perpetrated as a cover for: inaugurating the War on Terror, overtly advancing the NWO regime globally (in contrast to this previously covert operation), imposing a police state (Homeland Security) in the US (by gutting the US Constitution), UK and elsewhere, dominating and securing oil/gas reserves in the Middle East and Caucasus (to include running energy pipelines through Afghanistan and stealing Iraq's oil wealth via military invasion), jump starting the Afghan opium trade, etc., the ECO/FIN 911 of '08 is a cover for many of these same agenda items. However, there is one little item that is particularly high on the current agenda. And that concerns the derivatives market, which in its totality approximates somewhere between 750 trillion and 1 quadrillion dollars of instruments as of 2008. In fact, the sub prime mortgage defaults are just a tip of the tip of the iceberg when compared to the real megilla -- **DERIVATIVES**. This

is what they're really worried about, and having to cover for. Except this is a quadrillion dollar megilla that can't be covered without unraveling the entire capitalistic system, and its fascist corpocracy and kleptocratic oligarchy.

11. And then there is the teenie-weenie matter concerning the Federal Reserve, and its collection agency – the IRS. The man standing behind this curtain has a lot at stake, especially in the form of mountains of evidence that will indict, and convict, the entire system. Lots of evidence was destroyed during and after 911, as will happen after many of these Wall Street firms are taken over, nationalized, liquidated, merged and disappeared. The veil, however, has already been lifted.

Does anyone see a pattern here?!

The real lesson to be gleaned from this analysis is that events of such enormity and consequence are rarely spontaneous and unchoreographed. Especially when they happen just weeks from an era defining presidential election. They have obviously been planning this one for a long time, and it has been fastidiously engineered to have a very definite effect and desired outcome – a permanent planetary plantation (PPP).

The execution, thus far, has been flawless. Even for those of us who stood there on the 1st 911, and knew it was a fraud while the buildings were coming down, this one is exceedingly more difficult to penetrate. However, penetrate we will, until every last conspirator is sitting before the **TRUTH AND RECONCILIATION COMMISSION** spilling the beans. The ultimate and lasting effect of these inquiries will be a New World Order of our making, not theirs. The only remaining, \$64,000 question will undoubtedly be, “What do we do with them after we head them off at the pass?”

For the uninitiated, it may take quite a lot to wrap your mind around this extremely complex and convoluted plot, but, please, just be patient. As this drama plays out, the true intentions of the primary perpetrators will become manifest as they unwittingly reveal themselves by their handiwork. As Eliot Spitzer, no - Eliot Ness, nee – Sherlock Holmes once alluded to – a fingerprint inadvertently left as evidence is impossible to erase.

You see, the short sellers, unlike the “airplanes”, are still with us. Each one had a target to take down which they did with amazing speed and dexterity. And the myriad transactions that converged to topple their prey are all preserved somewhere, in some huge database, with multiple backups to serve as confirmation of trades of staggering amounts. AHHH! Nothing like computers, especially when they're not confiscated and shipped off to China for permanent disposal.

May all financial wizards and economic soothsayers, henceforth, be inspired to stare into their crystal ball and divine the upcoming financial and economic events of global proportions with the keenest of acumen and sleuthing. As we shine the LIGHT of our collective awareness on these rapidly unfolding schemes, we will serve as beacons of revelation, and hope to the world.

Remember – we now know the script. We know the major players involved. We know their MO: Controlled Demolition. We are able to watch the crimes being committed in real time. Each of us has now been thusly notified, and empowered, to serve as a vector of dissemination of this critical information. So ----> **LET'S GET BUSY !!!**

Special Message to the **Market Oracles** and Money Masters of the Universe

Our “PRE-PLANNED” scenario delineated above in no way ignores the true state of the national economy, international finance or global economic picture. In fact we are, and have been, fully cognizant of the fact that the true state of every market – real estate, equity, bond, commodities, currency, derivative, etc. has been in shambles for many years, just waiting for the Perfect Storm to come around and blow it all away.

It has been obvious to many of us that each of these markets have operated according to the whim of a very few individuals with extremely concentrated power to manipulate. Therefore, all markets can be artificially inflated, as we have seen time and time again. Likewise, they can be artificially deflated, sometimes rather quickly for effect, as we have seen. The “**Hidden Hand**” of the market is just that – a very carefully **hidden hand** that makes a complete and total mockery of every economic and financial theory ever advanced. Time for a lot of us to accept this fact of modern economic life.

Perhaps we should now take off our blinders and admit that while, yes, all of the indicators are, and have been, there for a catastrophic economic meltdown & financial cataclysm, these events are still completely controllable. All of us have seen bubble after bubble grow and balloon, and merge and overlap, and inextricably interpenetrate each other, until all we have is one massive bubble ready to pop. But, when will it pop?! It will pop when the confidence level is sufficiently undermined by the very same MEDIA that controls the flow of the relevant information. And who, pray tell, controls the media, if not the **Hidden Hand**? Clearly, the real Market Oracles are not a part of that MSM juggernaut. Therefore, it is incumbent upon each oracle to get it right, since they are the very best sources of pertinent financial and economic data/information.

The inevitability of self destructive capitalism does not preclude the process of controlled destruction. As the system eats itself, there are those who are eaten, and those who eat. We are witnessing this devolution in living color, as we both write and read these words. The “strong” at the top of the pyramid have always done the eating, as the “weak” at the bottom provide the bone for the stew. The only major difference at this particular, and final, feast is that the internet has allowed for an unprecedented explosion of accurate information in real time. Therefore, the playing field has been leveled like never before. The little guy or gal, for the first time ever, has the opportunity to take back a little, or a lot, of his/her power (WEALTH), should he/she so choose.

Even as the Wall Street gangs team up with the opportunistic political class, as well as the numerous corporate/legal jackals and lobby parasites, to effectuate the most massive redistribution of wealth (aka in your face **THEFT**) in recorded history, something has profoundly and fundamentally changed. There is a dynamic at work which can alter the game just enough to potentially turn the pyramid upside down. This, however, requires a no nonsense, “look in the mirror with raw honesty” approach. Then we (the oracles) will not deign to render a judgment that is not fully baked. And the recommendations we make are more likely to be issued in the best interest of ALL, especially for those who are in a position of class disadvantage, financial ignorance or structured powerlessness.

So, we have made it clear that all the forces have been put into place for the upcoming monetary apocalypse. But even these forces are controlled, each and every one of them,

all the way up to the top. It's probably a very good time to contemplate just **who it is** that resides at the peak of the global financial decision-making process. And, their agenda ???
